2017-1-UK01-KA201-036517

iCAP Partnership Meeting No. 2
in Vilafant, Catalonia-Spain from March 22nd to March 23rd, 2018

„ Desires to know, to change and to help are specific to human nature, being the ones on which this project is based. Within the project , we build a world, to a small extent, closer to the one we dreamed of. At the second international meeting, each country presented what it has done and what it intends to do. They are all intelligent people from whom we have a lot to learn. In addition, this meeting was helped us to expand our vision and projects, to help more people, not just our students, everything becoming more and more important, becoming really taken into account. We want to attract as many people as possible to such projects, to work as a team and to help others to not give up their dreams. Hope gives us the strength to make the necessary efforts, which like the North Star guides us through darkness to success." PREDA MARIA, VIN C

„Involves redefining existing patterns, creating new configurations that respond to the questions and challenges of the present until new discoveries come to the surface. Participating in this project has opened our doors to a different world, changed our vision. I had the opportunity to visit Barcelona. Even though we have gone through other beautiful cities of Europe, we have never found such a stylized mixture of epochs, people, cultures and languages. This meeting was attended by teachers and pupils who had the innovation as a common goal, and the objectives and activities that meet this goal are specific to each group. I really wish that those in Vilafant learn in the near future in a school that matches their wishes. The culmination of this visit was for me when I discovered the playful, fantastic, crazy and attractive art of the great Salvador Dali hosted by the same name museum located in a small Catalan town, Figueres, where the great painter was born. I am happy to be part of the wonderful team of this project, and this experience will help me in defining my adolescent personality." TRUȚĂ ANDREEA ANA MARIA, VI A
