# Eco-systems of Open Science Schooling - Making open science schooling a reality for secondary school students

2020-1-NL01-KA201-064504

## School Team Eco-System Empowerment Mobility Event

3-5 februarie 2021

Online (Zoom)

„The second meeting was a real success for us. Our students actively participated in the design of the project logo which they won by vote. During the meeting our students were creative, they communicated very well, they got involved in all the activities proposed by the partners and we are very happy about this.

I thank my colleagues and partners for this positive experience. We make a great team and I hope to collaborate as well in the future. "

Teacher Sinescu Ramona.

“The overall goal of the project is to create the first versions of local / regional ecosystems of open science schooling through intense dialogues with the community and relevant scientific resources. Students will identify different resources in the community / scientific resources and will create a "map of open school resources". Among the possible community resources could be, for example, Termo Craiova - institution visited by our school team in the days before this meeting.

The joy of the whole team of students and teachers was hard to describe in words when, by the vote of all participants in the project, the logo created by a student of our school became the logo of the project. Congratulations to our dear students and the project team members! "– Headteacher Cremene Cerasela
