# Eco-systems of Open Science Schooling - Making open science schooling a reality for secondary school students

2020-1-NL01-KA201-064504

## School Team Eco-System Empowerment Mobility Event

3-5 February 2021

Online (Zoom)

**Please comment on the winning logo of your school - how it was conceptualized - what the different parts represent or embody**

*"The flower represents us learning and growing together through science." - Alessia*

*"The logo is a flower, and its petals represent each flag of the countries collaborating on this project. The light bulb connects our planet with science. Scientific symbols can be found on the leaves. " - Alexandra*

"A picture is worth a thousand words!" and we believe that the logo created by our team managed to link all the essential information related to the project: partner countries - through flags, the idea of unity – the group of symbols, beauty, but also science, as a force that generates development.

On the leaves of the flower there are images that suggest many of the scientific discoveries or tools used in exploring nature through physics, chemistry and biology. You will see, among others, the chemical formula for water – the vital resource for life on Earth, the DNA helix – the hereditary material in humans and almost all other organisms, the rocket - the symbol of exploration and power and Albert Einstein`s famous formula linking substance and energy.

## **How do your students feel after knowing that their logo has been selected?**

*"When I found out that the Romanian logo won, I felt so happy and proud. Our work has been rewarded and I'm really glad about it. " - Alessia*

*"When I found out that our logo won, I was proud. I worked hard on this and I am happy that our work has been rewarded. "- Sarah*

*"Just as I saw the logo, I was wondering if the Romanian flag would appear and when I saw it, I was full of joy. The flower is the main logo of the project. And the petals represent the participating countries. And the rest of the flower structure indicates the main elements of science. In the middle there is a light bulb that indicates the ideas of collaboration and teamwork. " - Mihai*

*"We were very happy to find out that our logo won, because this victory brought us a small advantage in this project and improved the team's mood.*

*There were many interesting logo ideas and we are pleasantly surprised that ours will represent this project.*

*We thank the team and the project partners for all the support and encouragement provided so far. " Damaris*
